

Suzanne Schmidt,

I am reaching out to you, on behalf of American On-Site Services to help you meet your maintenance and cleaning needs in response to the COVID 19 pandemic. We are a local company based in Spokane Valley, servicing eastern Washington and northern Idaho. During this time of need we have expanded our services to include sanitizing office space, maintenance buildings, vehicles and etc.

The procedure we are utilizing uses fogging machines with CESCO WHITE FOG (Technical Data Sheet attached). Presently, there are no disinfectants that have been tested specifically for this emerging viral pathogen but CESCO is a fifth generation, four chain quaternary ammonium-based sanitizer used extensively in industry. It is a broad-spectrum antimicrobial product for control of bacteria. This fog has a very short dry time of just 2-hours and leaves no residue. For local government agencies, we are a listed on the MRSC registry as American On-Site Services.

As you consider the health of those in your facilities, American On-site Services is ready to assist you. Please feel free to contact me at jermaine@americanonsite.net or 509-244-8404

Thank you

Jermaine C. Yeldon
